

TRUCK-MOUNTED AI VISION GRADING

Bring grading to your harvest.

A mobile vision grading system for round fruit and vegetables.
Configured around your produce, required grades and operation.

~10 TPH

approximate kinnow throughput

14 + 1

14 grades plus rejection

10 kW

onboard generator

Mobile setup. Custom grades. Onboard power.

ROUND FRUIT & VEGETABLES

Built around your crop.

Kinnow is the featured throughput application. Other round produce can be assessed for a customised grading setup, with feeding, handling and vision settings matched to each crop.

**Kinnow****Oranges****Apples****Pomegranates****Guava****Tomatoes****Pears****Lemons****Sweet lime (Mosambi)**

Your produce. Your market. Your configuration.

Produce suitability, grading criteria and throughput are confirmed for your project. Capacity varies with crop, size, grade settings and operating conditions.

MOBILE GRADING, PLANNED FOR YOUR OPERATION

Grade where it matters.

Discuss a mobile setup for orchard-side grading, seasonal collection points or grower groups. Plan produce supply, crate handling and safe operating space around the vehicle.

14 grades + rejection

Seven grades on the left.
Seven grades on the right.
A dedicated rejection outlet.

PARAMETER	SPECIFICATION
System	Truck-mounted AI vision grader
Produce application	Round fruit and vegetables
Kinnow throughput	Approximately 10 tonnes/hour
Grading outlets	14 grades + 1 rejection outlet
Grade arrangement	7 grades on each side
Onboard generator	10 kW
Configuration	Matched to crop and customer requirements

The 10 kW figure is the onboard generator rating. Confirm vehicle specification, total power demand, dimensions and configured throughput in your quotation.

PLAN YOUR MOBILE GRADING SOLUTION
